Building Permit Fees

This handout includes information on estimated fees associated with building permits, and is subject to change without notice. Actual fees are determined by the regulations in effect on the date when application for permit is accepted and are calculated during plan review. This worksheet is not a required submittal item.

This handout does not include:

- Transportation concurrency fees,
- [Land use permit](#) fees, such as critical areas and design review permits,
- Public Facilities Construction application fees,
- [Fire Department Development Services](#) fees, such as fire alarm or sprinkler installations, or
- Latecomers.

Please see the appropriate applications/forms for those fees or contact Permit Center staff for assistance.

FEE DESCRIPTION	AMOUNT	WHEN DUE
Plan Review Fee - Building Services: See Section 1.	\$	Application submittal

Determining Project Valuation

Fees are based on project valuation. Plan Review and Permit fees are based on the determined *valuation* of a project, not the *cost*, to ensure permit fees are consistent.

Valuation means the estimated total cost of building construction, including all electric, mechanical, plumbing and permanently fixed equipment. It is not meant to determine market value of a structure.

Values provided by the applicant that appear to be significantly lower or higher than experience has shown with similar projects will be determined by researching recent similar permits to determine an approximate average square foot value for the work. The applicant may appeal this adjusted valuation by submitting documentation justifying a revision.

Total valuation includes design fees, but does not include land price or site development costs.

New Construction: Value for new construction will be determined using the most recent valuation table published by the International Code Council. The Permit Center handout titled "[Building Valuations](#)" (BSD form #178) includes these valuations.

For **new single family and duplex** construction, use the table below:

Finished Living Space (including finished basement)	Sq.Ft.	X	\$148.33	=	\$
Unfinished Basement	Sq.Ft.	X	\$23.20	=	\$
Utility (garages, sheds, etc)	Sq.Ft.	X	\$59.88	=	\$
Carport	Sq.Ft.	X	\$23.81	=	\$
Deck, uncovered	Sq.Ft.	X	\$21.26	=	\$
Deck, covered	Sq.Ft.	X	\$28.10	=	\$
TOTAL FLOOR AREA	Sq.Ft.		TOTAL VALUATION		\$

Converting Existing Space to new Use:

For new conversion of space uses in **single family and duplex buildings**

Utility to Living Space	Sq.Ft.	X	\$88.45	=	\$
Unfinished Basement to Living Space	Sq.Ft.	X	\$125.13	=	\$
TOTAL FLOOR AREA	Sq.Ft.		TOTAL VALUATION		\$

Remodels:

Valuation for remodel work will be determined by either:

- A copy of the contractor's contract / bid, or
- Total material cost provided by the customer and multiplying it by two (in the case where there is no contractor)
