Calls by Category

Calls for service are answered at the 911 center. They are triaged and dispatched into three broad categories: Fire (non-EMS), EMS, and Community Paramedic. These are called Dispatch Categories. As a call progresses and is finalized the final call type may change into one of hundreds of different final call types.

Call Volume by Dispatch Category

Final Call Type

Call Type	# of Incidents	Percentage of Calls
Rescue & Emergency Medical Service Incident	16,999	74.23%
Good Intent Call	3,023	13.20%
False Alarm & False Call	1,015	4.43%
Service Call	688	3.00%
Fire	683	2.98%
No Type Specified	275	1.20%
Hazardous Condition (No Fire)	160	0.70%
Special Incident Type	47	0.21%
Overpressure Rupture, Explosion, Overheat (No Fire)	7	0.03%
Severe Weather & Natural Disaster	2	0.01%

Fractile Times for Critical Calls

Fractile is a measurement used in emergency services to describe the percentage of time a specific metric is met. These are measured against critical EMS/Fire calls. A 90% fractile time means that 90% of incidents are below the stated time.

Critical calls are defined as calls with an 'Echo' or 'Delta' level response. These calls are triaged as requiring the highest priority response.

The times below are calculated for geographic areas in Bellingham Fire Departments primary jurisdiction

Turnout Time is the amount of time between an apparatus being dispatched to an incident to that apparatus being enroute to an incident.

Median Turnout Time

00:01:31

90% Turnout Time

00:02:51

Median Turnout and Response Time by Quarter

Response Time is the amount of time taken from dispatch to arrival on scene. First Unit Response is the time of the first unit to arrive to call

Median First Unit Response

00:05:11

90% First Unit Response

00:08:33

Fire Response

Calls that are given a final type category of 'Fire' are categorized below. Special attention is given to structure fires which include fire emergencies in buildings or mobile property used as a fixed structure.

Fire Response

683

Fire Incidents by Type

BFD provided aid **53** times to neighboring agencies for fire responses

BFD Received Aid **2** times from neighboring agencies for fire responses

Community Paramedic

The Community Paramedic program of the Bellingham Fire Department was established in 2014. The purpose of the program is to help connect frequent utilizers of 9-1-1 services for non-emergent medical needs to more appropriate services. The benefit of the program is two-fold; citizens are connected to medical and social services that better meet their needs and it creates capacity for the Fire Department to more quickly respond to true emergencies.

The Community Paramedic program most frequently serves citizens dealing with complex medical issues including substance abuse, mental illness and complications related to aging, disability, fall-risk and homelessness by assessing their needs and coordinating their care with appropriate community resources.
