

Barkley Trail

Description

This project includes a new trail connection between two existing trails via a City owned easement behind the Barkley Trails Apartments. This trail fulfills a commitment made in 1991 when the area was rezoned for higher density.

This project is part of the City of Bellingham's extensive trail system, which gives us places to walk, run and ride and provides a valuable community resources for having fun and exercising. Trails also provide an alternate mode of transportation and provide a place for outdoor recreation.
