

Bellingham Central Library Re-Roof

Project Overview:

The Bellingham Central Library is getting a new roof. The existing roof, which is decades old, covers approximately 20,000 square feet of surface area on the Library which is located at 210 Central Avenue.

The project consists of demolition and replacement of multiple layers of existing roof membrane and rigid board insulation, new skylights, new metal flashings, and mechanical system ductwork and supports. Re-pointing of brickwork adjacent to roof, and provision of miscellaneous items and accessories is included in the work.

Status - June 2017

Accomplishments- The construction bid has been awarded by competitive bid.

Next milestones- Construction is scheduled to begin July 5, 2017 and should be completed by September 1, 2017.
