

PUBLIC NOTICE

DATE POSTED:

TEMPORARY CLOSURE FROM NOVEMBER 2017 to APRIL 2018

The floating docks and ramps will be closed intermittently and without notice any time from November 2017 to April 2018.

Please bear with us as we remove and replace this aging structure. The existing facility is antiquated, damaged and beyond its intended design life. The new docks and piling will provide a level walking surface and greatly improve your boat launching experience for years to come.

The City will attempt to keep at least one, single-launch, lane open during construction. However, there may be no access to any of the floating docks for the entire duration of the project.

There may be times when the entire work area is closed to the public. During a complete closure, there will be no access for boat launches, trailers, parking, or any other activities within the work area.
