Contractor

B&W Excavating and Construction, Inc.

Project Description

Cemetery Creek Fish Habitat Enhancement Project: (EN-0021) consists of: (1) constructing new system channel segments to replace existing reaches that are to be filled, (2) constructing of 3 ponds, (3) enhancing a wetland swale and (4) integrated management and diversion of surface waters.

Salmon Park Fish Habitat Enhancement Project: (En-0022) consists of excavating a historic backwater channel and adding large woody debris that will provide juvenile salmon rearing habitat.

These projects are being implemented to restore The fishery resources damaged by the gasoline Spill and fire in Whatcom Creek on June 10, 1999.
