

City of Bellingham Current Construction Project

West Street Pedestrian Improvements

Project Description

This project provides for the rehabilitation/reconstruction of West Street between Squalicum Parkway and North Street. The final project will result in a roadway consisting of two 10-foot lanes, curbing, storm water controls, and construction of a 10-foot wide separated pedestrian path. In addition, safety will be provided by adding traffic calming measures including a traffic circle at the intersection of North and West Streets, a 6-foot wide median at the intersection with Squalicum and the provision for a future illuminated crosswalk at Squalicum Parkway. Street trees and native vegetation plantings will be incorporated to blend in with the neighboring properties.

Project Bid No: 65B-2006

Project Number: ES-0311

Project Schedule

- Awarded 8/7/06
- Anticipated days to complete: 50 days

Estimated Project Cost

- \$323,190.50
