

# City of Bellingham Current Construction Project

## Northshore Drive Roadway and Drainage Improvements

### Project description

Northshore Drive Roadway and Drainage Improvement Project includes a major overlay that was originally slated for construction in 2006 and has had sidewalk facilities and stormwater system improvements added. The design is a modification of a similar project completed by the City of Olympia Public Works last year known as RW Johnson Blvd that uses porous bike lanes as drainage infrastructure adjacent to an environmentally-sensitive area. The design retrofits the entire street to meet requirements for both enhanced and phosphorus treatment of stormwater runoff, as well as completing the gap in the sidewalk between Dakin Street and the Silver Beach Store.

**Project Bid No:** 66B-2008

**Project Number:** ES-0367

### Project Schedule

- Awarded 6/2/08
- Complete by: 9/15/08

### Contract Amount

- \$1,497,988.75

### Project Engineer

Freeman Anthony, P.E.  
Phone: (360) 778-7900  
Email: fanthony@cob.org

### Contractor

Interwest Construction Inc.  
Burlington, Washington
