

Fever Creek Bridge Replacement

Description

The existing pedestrian and bicycle footbridge over Fever Creek in the Illinois Street Right of Way near Roosevelt Elementary School was closed for public safety reasons. An inspection found the bridge to be in a condition that warrants closure until the bridge can be replaced.

The existing bridge was constructed by a Parks & Recreation Department trail maintenance crew more than two decades ago and has been repaired on several occasions over the years. Recently, erosion has damaged the bridge abutment to an extent that requires replacement. The bridge was removed and a new bridge was installed in 2017.

Funding

Park Impact Fees

Status

Complete. The bridge was officially opened to the public on July 20th, 2017.

Affected Neighborhoods

- Alabama Hill
- Roosevelt

Participating Departments

- Parks and Recreation
