

CITY OF BELLINGHAM

JOB DESCRIPTION

JOB TITLE: What-Comm GIS Analyst

UNION:231

DEPARTMENT: Police

SG:3

CS:N

FLSA:N

EEO4CODE:PR

JOB SUMMARY:

Responsible for the preparation and maintenance of geographic data sets and other information for use in geographic information system (GIS), computer aided dispatch (CAD), and mobile data terminal (MDT) systems. GIS attribute data is used by the CAD system's geo-processing subsystem (Geofile) which serves to create and validate records within the CAD and MDT systems.

Responsible for validating and ensuring accuracy of GIS spatial data, 911 Dispatch data, and the telephone company's Master Street Addressing Guide (MSAG) database. Responsible for creating and maintaining cartographic maps for both the Dispatch CAD system and for emergency response vehicles (MDT's).

SUPERVISORY RELATIONSHIP:

Reports to the What-Comm 911 Communications Center Deputy Director. Works under general supervision and the guidance of City and Departmental policies and procedures. May supervise lower level staff as assigned.

ESSENTIAL FUNCTIONS OF THE JOB:

GIS Functions

1. Performs advanced database management, advanced geoprocessing, complex geospatial analysis, map compilation, programming and project management. Reviews and documents business processes, requirements and work flow and establishes data collection and mapping techniques and standards.
2. Performs management and maintenance of emergency response GIS geospatial data. Prepares and formats GIS data such as street centerlines, addresses, emergency response zones, jurisdiction boundaries, and law reporting areas using ArcGIS software for upload to the geofile module of the Whatcom County E-911 public safety system.
3. Creates, updates and maintains maps within the Computer Aided Dispatch (CAD) system used by E911 dispatchers as well as maps in Emergency response vehicle MDT systems.
4. Performs data management and manipulation of all provided regional data sets including normalizing, merging and revisions as well as ensuring data is synchronized and current.
5. Collaborates with federal, state and local government agencies in collecting and merging GIS datasets required for E-911 county wide dispatch and mapping. Responsible for developing project schedules, communicating with stakeholders and other GIS and Public Safety personnel, and overseeing completion of activities.

What-Comm GIS Analyst

6. Develops GIS business processes to support the E-911 mapping system and emergency services. Works with professionals in a variety of disciplines within the City and Whatcom County to coordinate and develop strategies to incorporate multiple GIS data sets for use in E-911.
7. Provides resources, technical support and acts as liaison on behalf of What-Comm with other regional GIS departments, 911 professionals, emergency services professionals, consultants, and agencies.
8. Participates in State E911 GIS subcommittee regarding input and collaboration in creating statewide GIS dataset to be used for future Next Generation 911 call routing technology. Requires manipulating, uploading and correcting County wide data sets in order to adhere to State adopted data requirements.
9. Attends relevant conferences and training to stay current with industry trends.

MSAG Functions

1. Develops and maintains the Emergency Service Zone boundaries as well as Emergency Service Number (ESN) boundaries.
2. Maintains the Master Street Address Guide (MSAG) database system which consists of address and street data connected to emergency services districts (ESN). This shall include maintaining the integrity between public safety GIS and MSAG Emergency Service Zone Boundary layers to ensure essential accuracy of E911 telephone requests for service.
3. Acts as a central point of contact for emergency responders and dispatch personnel to coordinate MSAG and Public Safety System changes or discrepancies if discovered.
4. Coordinates with phone companies to ensure all names, telephone numbers, addresses, road names and emergency service numbers in database are available and correct in order to aid communications personnel with dispatching the correct agency to the exact location of the 911 emergency.
5. Coordinates address modifications with local jurisdictions to insure MSAG is kept current. This requires researching and correcting errors or discrepancies in addresses, street names, and number ranges. Researches and corrects all telephone service issues relating to MSAG validation and E-911 data failures. Checks new addresses and verifies that they fit within the proper address range.
6. Monitors annexations in municipal areas and coordinate with county and city officials regarding associated changes in street range numbers, community name and jurisdictional boundary as well as their emergency service and response zones.

ADDITIONAL WORK PERFORMED:

1. May direct lower level staff including training, prioritizing and reviewing work, as assigned.
2. Performs other related duties of a similar nature or level.

What-Comm GIS Analyst

PERFORMANCE REQUIREMENTS (Knowledge, Skills, and Abilities):

Knowledge of:

- Working knowledge of advanced GIS concepts, geo-processing functions and techniques, and spatial database management procedures.
- Comprehensive working knowledge of database concepts.
- Demonstrated knowledge of GIS programming and scripting languages .
- Operating systems, products and concepts involved in the operation of desktop computers.
- Structured Query Language (SQL) and its applications with GIS analysis and data/system integration.
- Oracle DBMS/SQL Server and ESRI ArcSDE Spatial Data Server.
- Demonstrated knowledge of GIS database design (geodatabase)
- The development, configuration and optimization of web mapping services (ArcGIS Server).
- Working knowledge of the functions of City departments, office operations and interdepartmental working relationships.
- Working knowledge of principles and procedures of project coordination.

Skills in:

- Excellent interpersonal skills for establishing and maintaining effective working relationships with clients, vendors and associates.
- Good oral communication skills, including good listening skills, to communicate with technical and non-technical internal clients.
- Working both as a member of a team and as a project leader.
- Writing in clear, concise language to produce reports and other required documentation.
- Operating, GIS hardware, software and related peripheral equipment as required to accomplish assigned duties.
- ESRI GIS software skills, including ArcInfo and ArcView for analysis and mapping.
- Planning, organizing, decision-making and time management skills, including the ability to appropriately prioritize assignments.
- Working independently under pressure and with minimal supervision to solve problems and meet deadlines.

Ability to:

- Combine knowledge of GIS databases and software with common sense and insight in solving problems and making decisions.
- Systematically identify and analyze the important dimensions of a problem, determining potential causes, obtaining relevant information, and specifying alternate solutions, then carrying out solutions or referring to the appropriate authority.
- Ability and willingness to demonstrate the Public Service Competencies of Service Orientation, Results Orientation, and Teamwork and Cooperation.
- Maintain consistent and punctual attendance.
- Physical ability to perform essential functions of the job including:
 - Adequate hearing, correctable vision, and manual dexterity;
 - Frequently operate a computer and read a computer screen or typewritten page;
 - Move between work sites;
 - Ability to occasionally lift light weight (up to 25 lbs.).

WORKING ENVIRONMENT:

What-Comm GIS Analyst

Work is primarily performed in an office setting and requires sitting or standing for extended periods at a computer work station.

EXPERIENCE AND TRAINING REQUIREMENTS:

- A Bachelor's degree with coursework in cartography, GIS or related field.
- Three years of GIS experience, at least one of which supporting business processes with integrated systems.
- An equivalent combination of education and experience which provides the applicant with the required knowledge, skills and abilities to successfully perform the essential functions of the position will be considered.

NECESSARY SPECIAL REQUIREMENT:

- Employment contingent upon passing a criminal convictions check, background investigation, polygraph examination and fingerprinting. Subject to re-check every five years.
