

What-Comm 911 Renovations

We're Designing a New 911 Dispatch Facility!

Project highlights:

- New facility will better meet growing needs of the county's emergency dispatch system
- Located on same site as existing facility at Alabama & Iron Streets
- High quality training and staff spaces with room for growth
- Improved redundancy and resiliency for emergency communications
- Environmentally conscious design to reduce energy consumption and operational and maintenance costs (LEED Silver Certified)
- \$12M project; construction expected to begin **Oct. 2025**, complete in **Oct. 2026**

JOIN US FOR A PROJECT DESIGN OPEN HOUSE!

When:

Wednesday, Dec 11
5:30 - 6:30 p.m.

Where:

Pacific Street Operations Center
2221 Pacific Street, Bellingham
(enter on Carolina Street)

Draft rendering - new dispatch facility

The What-Comm dispatch center provides county-wide 911 services, 24/7. This highly technical facility must meet the unique needs for its employees operating in high-stress, critical emergency roles.

The existing structure will remain functional throughout construction and will be demolished upon completion of the new building on the same site. Landscaping, design, and neighborhood character are being considered with project design.
