

DIG

Downtown Improvement Gardens

OPEN HOUSE

WHEN Tuesday, April 30, 5:30-7:30pm **WHERE** 1418 N State St., Bellingham, WA

Downtown residents and businesses are invited to join the City of Bellingham for the Downtown Improvement Gardens (DIG) Open House. The DIG project is designed to improve water quality in Whatcom Creek and add green spaces by installing 36 raingardens in strategic locations downtown.

Join the City of Bellingham for an open house kickoff to learn more.

The raingardens will help treat and infiltrate stormwater from over 90 urban acres that currently flows untreated into Whatcom Creek. DIGs also create attractive urban green spaces downtown, can enhance pedestrian and bicycle safety, and help protect ratepayers' investments in the piped collection system.

Become a DIG Steward

Downtown businesses located within the project area can become DIG Stewards. These business leaders will help provide oversight and maintenance of the DIGs. In return, the businesses will be recognized for their efforts to enhance our downtown and keep our creek clean.

Find more information, including a FAQ sheet and project map, on the City of Bellingham's website: www.cob.org
