

Fraser Stream Mitigation

Project Overview: ES-0405

The Fraser Street Mitigation in Lincoln Creek includes fish habitat enhancement of a side channel within Lincoln Creek adjacent to Fraser Street. The project is being constructed to mitigate encroachment upon this critical area by the construction of sidewalk improvements completed in Fraser Street Phase I (ES-246).

Status - August 2009

Accomplishments: Construction began 8/17 and all work substantially completed!

Next Milestones: Site is stabilized and prepared for Washington Conservation Corps crews to complete landscaping this fall.
