

Water Meter and Assembly Box Installation

1. Utilities are located in the right-of-way. Several colors of spray paint appear. The blue stake and white paint indicate where water crews will be digging.

2. City water crew arrives.

3. Staff knock on your door to let you know work will begin. Your water service may be off for up to an hour.

4a. An excavator may dig the hole.

4b. At some sites, crews will dig the hole using shovels.

5. Staff uncovers the water shut off.

6. The water meter resetter gets installed.

7. Staff installs the water meter and checks for leaks.

8. The meter assembly box is placed.

9. A lid covers the box, the hole is filled.

10. The area is cleaned.

11. Staff knocks on your door and leaves a notice of completion.
