

Padden Creek Daylighting Open House Presentation

June 4, 2013

City of
Bellingham

Challenges

- Padden Creek, between 17th and 22nd streets, flows in a tunnel constructed in the 1890's
 - The tunnel is the major blockage to fish passage (67% blockage by WDFW rating)
 - The tunnel is undersized and results in approximately 15 city blocks of residential housing that are in the flood plain

Padden Creek Area

FEMA Floodway and Floodplain

Stakeholders

- Padden Creek Alliance
 - Adjacent property owners
 - Concerned citizens
 - Fish advocates
 - Happy Valley Neighborhood Association
- WA Department of Fish and Wildlife
- WA Department of Transportation
- Nooksack Salmon Enhancement Association
- City of Bellingham

Upstream end of tunnel

Downstream end of tunnel

Padden Creek Lagoon

What is the project?

- Construction of a creek channel between 17th and 22nd streets along Old Fairhaven Parkway
- Project removes the major fish blockage for the creek
- Project eliminates reliance on a 1890's tunnel to convey Padden Creek

What more is the project?

- Construction of the channel should alleviate the flood hazard for approximately 80 residences. This would result in savings on insurance for the property owners.

Work to date

- 1997- Present: Work sessions with Padden Creek Alliance, interested parties and the City of Bellingham
- 2001: Feasibility study by City (RW Beck) which removes tunnel
- 2002: Feasibility study by Jones Engineering for Padden Creek Alliance which retains tunnel
- 2011: DOE Revolving loan of \$1,426,000 and Centennial Grant of \$500,000 received

Work to date

- Property acquisition
- 2012: SAIC (formerly RW Beck) teamed with Jones Engineers begin work on design
- 2013: Currently at 60% design stage for the creek
- 2013: WSDOT begins bridge construction on Old Fairhaven Parkway for future creek channel
