

Bellingham Public Works
We work for clean water!

I vacuum!

I'm Victor the vector truck!

I suck up water and dirt out of storm drains and sewers. I work a lot like the vacuum cleaner that you have at home. If there is a clog in a pipe, then I come in and suck everything up so that water can go through the pipe.

May 16- 22, 2021 is National Public Works Week. The City of Bellingham Public Works department provides essential city services such as clean drinking water, wastewater treatment, stormwater management, protection of natural resources, and safe streets and sidewalks for transportation. Show your appreciation for all the stormwater and construction project management the City of Bellingham Public Works Department does by sharing your artwork on social media and tagging your post with **#NPWW** during National Public Works Week.
